Web-Based Benefits Enrollment

Quick Enroll, available through your Employee Portal

If you are looking to take the paper out of the enrollment process, but don't have the time or budget for a full-featured web enrollment application, Quick Enroll may be the perfect solution. Leveraging an Employee Portal platform built with DotNetNuke's powerful capabilities, within 2 weeks we can provide a solution to automate the data collection for enrollment.

Quick Enroll allows employers to offer their employees a Web-based enrollment solution where employees go to the Web and complete an enrollment collection form, and the data gets passed electronically back to the administrator in excel format.

Features and Benefits

Employers offer employees the access to all benefits information via Matriarch.

- Your Employee Portal allows for complete customization look & navigation.
- Secure access to users to view select content and pages
- Information is easily updated anytime, anywhere
- Can post and document or link to any site
- Provide content employees want and need
- Employees enroll in benefits through HTML Form
- Forms may be completely customized to include any data collection requirements
- Forms may vary by site, location, class
- Employees can view and print confirmation of enrollment
- Employee receives email notification confirming enrollment
- Administrator receives enrollment data in excel format
